INTRODUCTION

DeFi is short for “decentralized finance,” an umbrella term for a variety of financial applications in cryptocurrency or blockchain geared toward disrupting financial intermediaries.

NFTs are digital blockchain tokens that represent ownership of unique items, whether digital or physical. NFTs can represent real estate, art, music, and even casks of whisky.

Kumo is a decentralised art collective made up of bohemian artists and *OG bitcoiners*. All members are passionate about Art, NFTs, Gaming and building a user friendly cryptocurrency ecosystem. We advocate the widespread use of strong cryptography and privacy-enhancing technologies as a route to social and political change within the traditional art industry and society at large.

At **Kumo** we draw inspiration from blockchain and combine real art work with NFTs and DeFi farming applications.

DEFI FARMING

yield farming meets NFTs

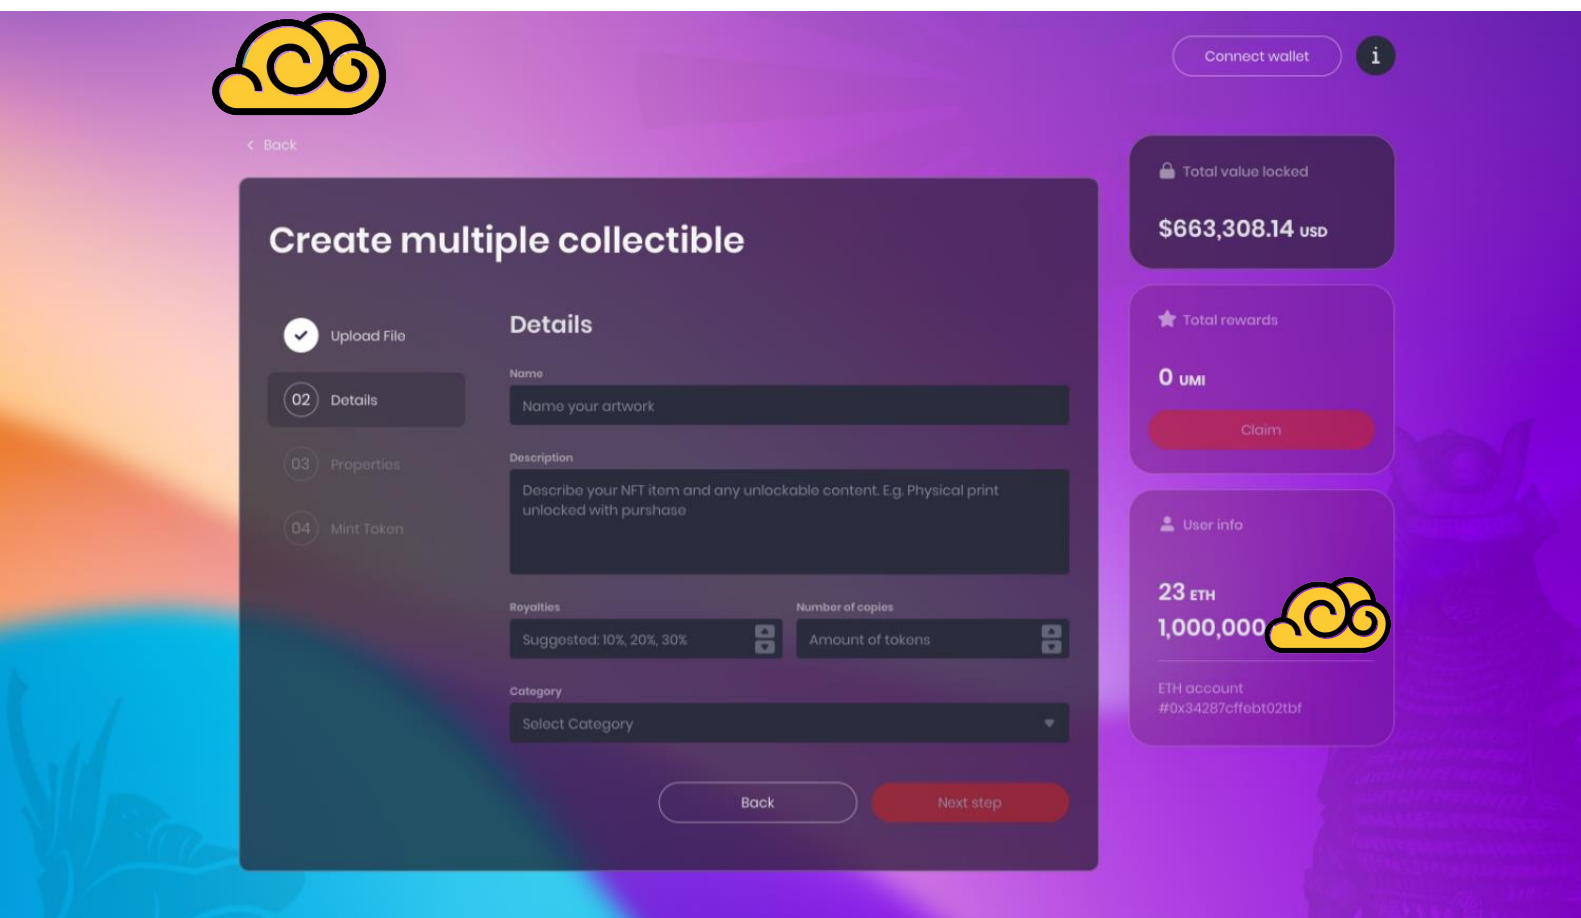

\$KUMO token is a cryptocurrency developed on the Binance Smart Chain network. Simple stake KUMO BEP20 to earn passive rewards.

Alternatively, you can farm bigger rewards through the magic of computer programs called smart contracts, by staking Liquidity Pool tokens to earn ultra-high yield rewards and even rare NFTs. Staking rare NFTs alongside LP tokens can boost your yield powers exponentially. Compete with other farmers for the chance to harvest the best and most rare NFTs.

NFT Minter

A state of the art NFT minter that lets you pick which blockchain you want to use to mint NFTs. The KUMO NFT minter will be available on the Binance Smart Chain network initially.

ART GALLERY

merging the digital with the physical world

Kumo.Digital will be a self-sufficient gallery and art collection where clients can purchase digital art represented on the blockchain in the form of NFTs, before turning the said NFTs into physical art prints, canvas creations or full size hand-drawn replications, before having the pieces delivered (worldwide) straight to their door at the click of a button.

NFT Games

Creating NFTs will real cryptographic value and utility

Kumo.Digital continues to innovate and expand the way in which NFTs can be utilized in both the physical and digital worlds. At the crossroads of where art and finance meet, there is the application of gaming. We believe the next evolution after NFT art marketplaces and NFTs in DeFi will be NFT gaming. Therefore we are working hard to develop the next NFT gaming unicorn.

TOKENOMICS

KUMO TOKEN is a token that exists on the Binance Smart Chain network. There is a max total supply of 100,000,000 KUMO. Stake \$KUMO to earn passive income.

KUMO BEP20 Staking APY = 28%

Binance Smart Chain BEP20 Token Contract Address:

[XX](#)

Users must pay \$KUMO to use the tools/services of KUMO DIGITAL, such as minting NFTs, airdrop NFTs, airdrop tokens, etc. This \$KUMO is then collected and redistributed back to community via farming or removed from circulation by burn.

CONCLUSION

KUMO is a distinct project, utilising blockchain technologies and rare hand drawn artwork to create an exciting & rewarding experience for the user; whether they are new to cryptocurrency and blockchain technology or a *diehard* Degen farmer.

KEY TAKEAWAYS

- **NFT Minter**
- **Digital Art Gallery**
- **DeFi Farming**
- **NFT Games**
- **NFTs // Hand Drawn Artwork**
- **Multichain ecosystem**
- **Binance Smart Chain Token**
